Restoranlar, kantinler, hastanelerve benzerlerindeki çift etkili kanatlı kapılar, ek koruma için genellikle hem itme hem de çekme plakaları ile donatılmıştır.

Bununla birlikte, kavrama alanında alternatif bir düzenleme düşünülebilir. Kapının iki yüzünün yukarıda gösterilen kombinasyonla döşenmesi, istenen salınım yönünün uygulanmasını sağlar.

Double-action swing doors in restaurants, canteens, hospitals and so forth are generally fitted with both push and pull plates for added protection.

An alternative arrangement is conceivable in the gripping area, however. Furnishing the two faces of the door with the combination shown above allows the desired direction of swing to be implied.
